

What is claimed is:

1. An emulsion composite comprising strong alkali ionic water as a dispersion medium and emulsion particles made of an oil component.

2. The emulsion composite as claimed in claim 1 or 2, wherein the strong alkali ionic water is super-reductive water.

3. The emulsion composite as claimed in claim 1, wherein pH is from 8 to 11.

4. The emulsion composite as claimed in claim 1, which further comprises a perfume.
